

## Captain's Comments

On Friday January 12th, a very special visitor by the name of Jamie McDonald came to visit Ignace School. Jamie is travelling across Canada for a second time to create awareness and raise money for the Sick Kids Hospital. It was a very motivating visit and the students of Ignace School were extremely pleased to have met such an inspirational person.

## Great Things Happening At Ignace School

1. Ignace School has begun to prepare for an upcoming musical called "Eat It." Thanks to the help and guidance of Jacqueline and Connie, we will be presenting a wonderful show that will surely entertain people of all ages.

2. Ignace School now has a STEAM room, (Science, Technology, Engineering, Art and Math). From Lego to robots, this room is filled with many activates that help our students create and wonder all about the wonderful world of science and beyond.

3. School Sports continue to be underway. Our girls' volleyball teams and boys' basketball teams are continuing to make us proud with all their hard work. A huge thank you to all of our dedicated coaches for making helping create such wonderful opportunities.

4. Our Kindergarten Program is continuing to create many wonderful and enriching opportunities for our students. Our boys and girls are immersed daily in a variety of activities that peak their interest and encourage problem solvingskills. Mr. Nyberg and Ms. Chapman keep them engaged and learning in a rich environment.

5. Ignace's grade 7/8 class had the pleasure of learning about the careers of Ignace's paramedics. The paramedics spoke to the class about what kind of education path they would need to follow, what life skills are valuable, and what the career entails. Students got to experience firsthand what some of the equipment does, how to read blood pressure, and discuss blood oxygen levels. Thank you to Janet Griffiths, Steve Dunk, Christian Nobles and manager Richard Kosan -- the paramedics who volunteered their time to make a difference in the students' lives. Who knows ... in a few years, these students could be our future Ignace paramedics!
