Grade 3/4 'Mathenger' Hunt

In March, Miss Romas had the idea to incorporate math into a fun activity for grade 3/4 students. Using math questions hidden around the schoolyard, students used their great math skills to uncover answers to 2D and 3D geometry questions, while also having fun working together and running around the schoolyard. The activity was a big hit with the class and showed a great way to incorporate learning outside of the classroom.

Survival Swimming Course in Dryden

Students from grades 5-8 got the opportunity to travel to Dryden to take part in a survival swimming course held at the Dryden Pool & Fitness Centre. Both classes took turns in the pool, and got to do many different activities, such as 50 meter swims, Talk and Toss drills, and many other safety lessons. The course was very educational and will help students to have a better understanding of water safety and rules.

7&8 Badminton Tournament

Students of the 7&8 class travelled to Kenora to participate in a badminton tournament being held at Beaver Brae Secondary School, and competed in many great games. All students played very well, Sydney Cloutier and Sage Cloutier both took home first place in girl's and boy's singles respectively, while Erik Qualie and Zac Smith placed third for boys doubles. A big congratulation goes out to all players and the coach Mr. Prager. Great job!

NORWOSSA Badminton Tournament

The annual NORWOSSA Badminton tournament was held on April 18th, at Sioux Mountain School in Sioux Lookout. Phoebe Deschenes and Damara Delescaille competed against players from around the district. Damara managed to win almost all of her games, but just fell short in her last game. Phoebe played hard in all her games, and took home second in the junior girls' tournament and moved on to compete in the NWOSSAA tournament in Thunder Bay. Phoebe played students from the Manitoba border all the way to Chapleau and finished in sixth place. Thank you to Mr. Lotsios for his dedication in coaching this year.
